SYSTEM UPGRADES

Upgrading is a cost-effective method for increasing the performance and capabilities of your system to meet the demands of today's software. We have put together a list of some popular upgrades that will get your system up to date for not a lot of dough. Of course, if your requirements are more specific, please call for recommendations and a custom quote.

Excellent value Intel upgrade provides excellent performance, HDMI capable video, and M.2 support

Intel Celeron G3900 Haswell 2.8Ghz Dual-core Socket 1151 CPU, Integrated Intel HD510 Graphics, 2x256KB L2, 2MB L3, 14nm, 51w - retail box

ASUS H110M-A/M.2 Intel H110 Socket 1151 Mainboard - HDMI, DVI-D, VGA, 2xDDR4, 1xPCI-Ex16 v3, 2xPCI-Ex1, 4xSATA6, 1xM.2, 8Ch Audio, Gigabit LAN, 4xUSB3, 6xUSB2, mATX

Crucial 4GB 2133Mhz DDR4 Memory - CI15

\$295⁸⁴

With integrated Radeon R7 graphics, this upgrade provides a cost-effective entry to gaming with room to grow

AMD A8-7650K Kaveri 3.3/3.7GHz Quad-Core Socket FM2+ APU - Radeon R7 Graphics, 4MB L2 cache, 95w, 28nm (retail box with Heatsink & Fan)

Gigabyte F2A68HM-H AMD A68H Socket FM2+ Mainboard - CPU Video - HDMI, VGA, 2xDDR3, 1xPCI-Ex16 3.0, 1xPCI-Ex1, 1xPCI, 4xSATA6 RAID, 8Ch Audio, Gigabit LAN, 2xUSB3, 8xUSB2, mATX

Kingston 4GB 1600Mhz DDR3 Memory - CI11

U5-137513

\$239⁸⁴
